

# Hong Kong Science Park Phase 2 Project

## Multimedia Display

# Office Directory

2006 - 2007

Made with Adobe Flash

An abstract graphic consisting of several overlapping, curved, translucent shapes in shades of blue and purple, located on the left side of the page.

## Description:

Office Directory is an extension of the Tenant Directory. As same as Tenant directory, it helps visitors searching out information of tenants of Science Park.

Office Directory was designed for display on a 22" plasma screen that contains touch-screen function. By the special pixel ratio, a distortion was caused. The front-end interface has fixed the problem in visual.

To enhance the user experiment on touch-screen navigation, the interface was designed innovatively, such as the "Scrolling Halo" function.

## Opening Animation

- Virtua 3D slide in effect
- 1.5 Sec

• Zensis Limited

Zensis develops state-of-art technologies focusing in digital imaging and mobile applications for the global corporate and consumer market. Founded in 2003, the core technologies of Zensis, PhotoRite and VideoRite, are US patent-pending technologies that automatically correct common problems and significantly improve the visual quality of photos and videos.

Based on these technologies, Zensis has developed multimedia applications and software modules that allow users and device manufacturers to enhance, enrich and edit photos and videos in a very easy way. They run not only on PC, but also on mobile phones, digital still camera and other handheld devices, as firmware, software module, and software products.

Zensis has released several popular software products for home users, all of them have the powerful "1-Click Autofix" function;
